(54) Title: WATCH WITH A CONTAINER

(54) Titre : MONTRE AVEC UN CONTENEUR

(57) Abstract: The invention relates to a watch housing comprising a body made in two parts (2, 3), connected one to the other. The one of the two parts (2) guarantees the function of a watch whilst the second part (3), connected to the bracelet, comprises means for attachment of an interchangeable module (M). Said module (M) is extended by an elastic tongue (20) and security means are provided to ensure that the tongue (20) is supported on the first part (2) whilst subjecting the above to a permanent force maintaining the same in the open position.

ABSTRACT

The invention relates to a watch housing comprising a body made in two parts (2, 3), connected one to the other. The one of the two parts (2) guarantees the function of a watch whilst the second part (3), connected to the bracelet, comprises means for attachment of an interchangeable module (M). Said module (M) is extended by an elastic tongue (20) and security means are provided to ensure that the tongue (20) is supported on the first part (2) whilst subjecting the above to a permanent force maintaining the same in the open position.
